  Description : The Blog Web App is a dynamic platform that allows users to create, view, and engage with blogs. This application is built with modern web technologies and offers a seamless user experience. Key features include:
  - **Blog Creation**: Users can easily create and publish their own blogs, adding rich text, images, and other media to share their thoughts and stories.
  - **Browse Blogs**: Explore blogs created by other users.
  - **User Authentication**: Secure sign-up and login processes ensure that user data is protected.
  - **Email Verification**: New users are required to verify their email addresses to ensure the authenticity of accounts and enhance platform security.
  - **Forgot Password**: Convenient password recovery options allow users to reset their passwords via email, ensuring they can always regain access to their accounts.

CERTIFICATION

- **HTML5 - From Basics to Advanced level : Udemy : 2023**
- **CSS - Basics to Adv for front end development : Udemy : 2023**
- **Javascript - Master JavaScript from Basics to Advanced : Udemy: 2024**
